How to refer to books with editor(s)

Vinod Kumar *Editor*

Biological Timekeeping: Clocks, Rhythms and Behaviour

Springer
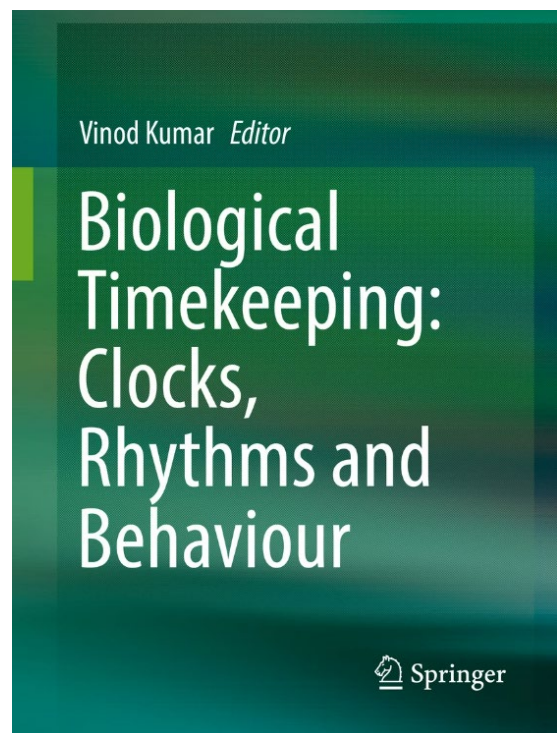

Innholdsfortegnelse (Table of contents):

Tittel på Boka: Biological timekeeping clocks rhythms and behaviour

How to refer to this chapter in a book with an editor
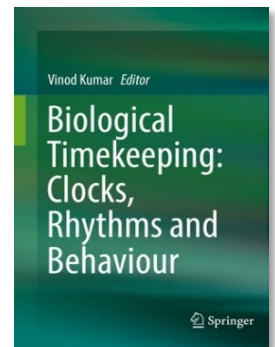

- Books with editor(s) vs ordinary books

- Ordinary book = a book where the author(s) have written all chapters (the whole book)
- Edited book = books with editor(s) will have authors for each chapter

Books with editor have different authors for <u>each chapter</u> of the book. When citing something in the book, cite the chapter where you found the information.
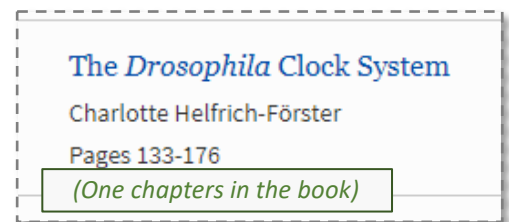

References for books found in Oria will (usually) be imported as "Books" or "Electronic Books" (not Book section).

How to do it?

1. After import, change reference type from **Book** to "**Book Section**"
2. Copy/paste editor name from "**Author field" to "Editor field**"
3. Copy/paste book title from "**Title field" to "Book title field**"
4. Enter the chapter author name manually in "**Author field**"
5. Enter the chapter title manually in "**Title field**"
6. Enter the chapters **page numbers**

Editor: Vinod Kumar

The *Drosophila* Clock System
Charlotte Helfrich-Förster
Pages 133-176
(One chapters in the book)

1. Change **Reference Type** to **Book Section**
2. Move **Author**-name to **Editor**-name
3. Move **Title** to **Book Title**

Manually enter the:

4: chapter author name in "Author field"

5. the chapter title in the "Title field"

6. pages

If you want to cite the book as "one whole book", change **Reference Type** from **Book** to **Edited Book**. The reference will then show **Ed**. in parentheses behind the name.
